Personal Projects:

Meal Mastermind [React JS, Redux-toolkit, Firebase database, Firebase authentication, Spoonacular Food API, Material UI, Firebase hosting]
Link :- https://mealmastermind-4e4c7.web.app/
This project provides platform for users to discover, save, and share recipes while providing tools to manage their own recipes and preferences effectively.
User Authentication:
- Users can register and log in using their email and password.
- Google authentication is available for a faster login process.

Recipe Search and Filtering:
- Users can search for various recipes based on keywords.
- Filters are provided to narrow down recipes based on nutrients like calories, protein, fat, etc., and cuisines such as Italian, Indian, Mexican, etc.

Adding and Managing Recipes:
- Users can add their own recipes.
- They can edit or delete their recipes as needed.

Favorite Recipes:
- Users can like recipes, and these liked recipes are saved to their favorites section for easy access.

Managing Liked Recipes:
- Users can view their liked recipes and remove them from the favorites section if desired.

My Portfolio [React JS, Redux-toolkit, Firebase authentication, Material UI, Firebase hosting]
Link :- https://portfolio-23ff2.web.app/
- Users can learn about my background, skills, and professional experiences.
- Visitors can view my resume directly on the website and have the option to download it for offline reference.
- A section showcasing my works, projects, and accomplishments, giving visitors an overview of your skills and expertise.
- Clear contact details are provided, allowing visitors to get in touch with me easily. This may include a contact form or direct email.
- Links to my Twitter, GitHub, and LinkedIn profiles are included, allowing visitors to connect with me on these platforms for updates and networking opportunities.
